Helping good people change the world.

CRITICAL THINKING & PROBLEM SOLVING

How to Reason, Solve, and Influence Logically

Critical thinking is NOT about being critical, it's an essential skill that enables professionals to systematically analyze problems and logically evaluate information to identify reasoned solutions. Through facilitated discussions, problem solving activities, and other real-world applications, this program will help you think about what you're thinking about, focus on facts, ask probing questions, recognize biases, and avoid logical fallacies. Want to reason, solve, and influence logically? This program is for you!

Format and Duration:

- Online (worldwide) or onsite (Americas, Europe, Asia); 4-8 hours

Learning Objectives:

- Engage in lateral thinking, professional skepticism, and focused inquiries
- Identify underlying assumptions
- Evaluate evidence objectively
- Recognize and avoid critical thinking errors and logical fallacies

Leadership Competencies:

- Solving problems analytically
- Taking initiative and being decisive

Fields of Study:

- Business management and organization
- Personal / professional development
